PROFESSIONAL SUMMARY

BCA graduate currently working as a freelance AI Contributor / Data Annotator with DataAnnotation.tech. Experienced in reviewing AI-generated content, following detailed project guidelines, and applying logical reasoning and attention to detail. Also runs IRA Creates, an independent web and digital branding venture, and develops web and creative projects using HTML, CSS, JavaScript, Three.js, Base44, and SVGator. Explores AI-assisted workflows and automation using Claude connectors and MCP integrations. Interested in remote AI evaluation, data annotation, software testing, and web development opportunities.

PROFESSIONAL EXPERIENCE

AI Contributor / Data Annotator | *DataAnnotation.tech — Freelance | September 2026–Present*

- Currently completing freelance AI data annotation and evaluation tasks for DataAnnotation.tech.
- Review and evaluate AI-generated content according to project-specific instructions and quality criteria.
- Apply logical reasoning, careful review, and attention to detail to identify inconsistencies and assess response quality.
- Work independently in a remote, task-based environment while following detailed guidelines.

Independent Web & Digital Branding | IRA Creates | 2026–Present

- Established an independent freelance venture focused on web development and digital branding.
- Created the business identity and designed business cards using Canva.
- Develop and present independent digital projects while managing the creative and business setup.

EDUCATION

Bachelor of Computer Applications (BCA) | University of Madras | 2023–2026

Relevant coursework: Data Structures, C, C++, Java, Database Management Systems, Software Engineering, Software Testing, Web Technology, Operating Systems, Data Communication and Networking, and Computer Graphics.

TECHNICAL SKILLS

Programming: C, C++, Java, JavaScript, VBScript
Web Development: HTML5, CSS3, Responsive Web Design, Three.js, Base44
Animation & Design: SVGator, SVG Animation, Reusable Animation Templates, Product Advertisement Design
AI & Automation: AI Data Annotation, AI Content Evaluation, AI-assisted Workflows, Claude AI, MCP Connectors, Automation Design
Databases: SQL, DBMS, RDBMS
Testing & Quality: Software Testing Principles, Test Cases, Debugging, Error Identification, Logical Evaluation, Quality Checking
Tools & Platforms: Git, GitHub, VS Code, Eclipse, Canva, Meshy AI

PROJECTS

ReliefChain — Disaster Relief & Emergency Response Web App | *Base44, GitHub Integration, Claude Connector, UI Maps*

- Built a mobile-first disaster relief web application inspired by the need for accessible emergency information during severe weather and other disasters.
- Organised the experience around four user areas: Personal, Volunteer, Coordinator, and a no-login “I Need Help” flow that requests location access.
- Designed a four-step automation chain for emergency updates and response coordination, with AI-assisted update workflows and map-based interfaces.
- Included an offline-save option and an SOS flow designed to remain available when network connectivity returns.

Live Web App: https://misty-rapid-relief-link.base44.app

Product on Cruise: The Shadow Knows | *SVGator, Claude AI, SVGator MCP Connector*

- Created a reusable animated product-advertisement template featuring a looping ship voyage and product presentation across different visual moods.
- Built three related versions: the main product advertisement, a sub-brand/product-collection variation, and an infinite-loader concept.
- Made key content replaceable, including the headline, tagline, brand name, logo, call-to-action, and transparent PNG product images.
- Used Claude AI with the SVGator MCP connector to help build and refine the animation workflow.

Main Template: https://app.svgator.com/editor#/02633f8f2bc5489092baeafc533f4edf
Sub Brands: https://app.svgator.com/editor#/cf60e0c18f6e4236bc0735ef7f0c0c91
Infinite Loader: https://app.svgator.com/editor#/bafa5b7149cc4bfa917bee50bc34e750

Interactive Personal Portfolio | *HTML, CSS, JavaScript, Three.js, GitHub Pages*

- Designed and developed an interactive portfolio website presenting technical skills, education, projects, and professional information.

- Built responsive layouts and interactive interface elements using HTML, CSS, JavaScript, and Three.js.
- Published and maintained the project through GitHub Pages.

Bata vs Brands — Web Project | *HTML, CSS, JavaScript, GitHub*

- Developed a web project with a structured interface for presenting product and brand information.
- Applied responsive design, debugging, and GitHub-based project management during development.

AI-Assisted 3D Model Exploration | Meshy AI

Explored AI-assisted 3D model generation using Meshy AI.

Meshy AI Project: https://www.meshy.ai/s/9m2Xc4

CERTIFICATION

Introduction to Software Testing — University of Minnesota, Coursera

Studied software testing fundamentals, test cases, expected results, debugging, defect identification, and quality assurance principles.

Certificate: https://coursera.org/share/7009da6bf2724911e481e57d561d637f

ADDITIONAL EXPERIENCE

AI-Assisted Digital Content Creation

Create and edit educational digital content using AI-assisted tools, including AI voice-generation workflows. Review generated content for clarity, consistency, and presentation quality.
